

Lamb - Ann Morris, Lummi Island, WA

Medium - Bronze

\$20,000.00

sculp 8 ture

Morris has always been fascinated with bones. The shape of bones is not a geometric shape but a natural organic one. Bones are the invisible inner structural support of many life forms...including us.

The artist looked at an actual lamb bone to make this very much larger-than-life size sculpture. Imagine how big a lamb would be to have a leg bone this huge. Do you ever think about your bones? The artist hopes this sculpture will make connections between what is outside and what is inside of each of us.
